

I do not believe XM Radio should be "silenced" over the traffic and weather stations they provide to their subscribers. I believe it is a very important service they have made available. As a long distance road driver I find them, traffic and weather, extremely helpfully when traveling through larger city areas. A majority of the times the "local" stations do not reach out far enough, in order to make travel plan changes to avoid a mess. XM Radio should be able to broadcast.

Sincerely,

Marlene L Bailey
